

For Immediate Release

**The SAMBA Federal Employee Benefit Association Selects HEALTHsuite®
and eHealthsuite™ from RAM Technologies to Replace Two Legacy Systems**

FORT WASHINGTON, PENN. – March 3, 2009 - RAM Technologies, Inc., a leading developer of software solutions for the administration of health and non-health benefits is pleased to announce that the SAMBA Federal Employee Benefit Association has selected the HEALTHsuite® enterprise administrative application and eHealthsuite™ web portal solution to replace two legacy systems. SAMBA will utilize RAM's advanced solutions to administer Health, Life, LTD, Dental, and Vision benefits for their membership.

SAMBA is a not-for-profit federal employee benefit association with an array of insurance plans to meet the needs of their members - including the comprehensive SAMBA Federal Employees Health Benefit (FEHB) plan, a separate health plan for dependent children ages 22 to 27, life insurance, dental, vision, and disability income protection insurance.

“SAMBA selected RAM Technologies and their solution HEALTHsuite based on their ability to meet our diverse benefit administration needs” said Walter Wilson, Executive Director of SAMBA. “HEALTHsuite’s advanced functionality supports the complex needs of our Federal Employees Health Benefit Plans as well as our non-health benefit plans, making it a solid fit for our needs. Implementing HEALTHsuite will allow us to retire two legacy applications.”

HEALTHsuite is an enterprise wide application with fully integrated modules to automate all aspects of enrollment, eligibility, benefit administration, provider contracting and reimbursement, medical management, premium billing, care management, claims adjudication, subrogation / overpayment recovery, reporting and more. Additionally, HEALTHsuite provides advanced capabilities to support the administration of non-health benefits including life, accidental death & dismemberment, short term and long term disability.

The eHealthsuite solution is a secure web portal that reduces demands on customer support personnel by providing real-time, self service access to information for members, providers, employers and brokers to interact in real time with the health plan. eHealthsuite’s self service capabilities allow users to conduct transactions from their office or home through a secure Internet connection. Plus, eHealthsuite supports real-time adjudication of claims enabling health plans to curtail the expense involved in claims processing.

“RAM Technologies is happy to welcome SAMBA to the ever expanding RAM family of clients,” stated Christopher Minton, Executive Vice President of RAM Technologies.

“HEALTHsuite’s expansive functionality will provide SAMBA with a fully integrated enterprise platform to administer both their health and non-health benefit offerings. The capabilities that HEALTHsuite and *eHealthsuite* provide will enable SAMBA to gain real operational efficiencies while streamlining their application portfolio”.

About the SAMBA Federal Employee Benefit Association

For over 60 years, SAMBA has been dedicated to protecting federal employees, annuitants, and their families. SAMBA works closely with top-rated insurance carriers to create plans at affordable rates to fill the specific needs of their members and their members’ families. All federal employees and annuitants, regardless of employing agency, are eligible to enroll in the SAMBA plans, including the SAMBA FEHB Health Plan. For more information visit www.sambaplans.com
