

For Immediate Release

**For Third Straight Year RAM Technologies Named to Philadelphia Business Journal's List of Top Technology Employers**

**FORT WASHINGTON, PENN. – May 25, 2010** - For the third straight year, RAM Technologies, Inc. of Fort Washington, Pennsylvania has been named to the Philadelphia Business Journal's Largest Tech Employers list. The list features the fastest growing technology businesses in the Greater Philadelphia region. RAM Technologies is a software development firm specializing in advanced solutions for the administration of healthcare benefits. RAM's solutions include HEALTHsuite® and *eHealthsuite*™.

HEALTHsuite is a comprehensive software application designed to automate all aspects of a health plan's business including eligibility / enrollment, benefit administration, provider contracting / reimbursement, medical management, premium billing, care management, claims adjudication, overpayment recovery, capitation, subrogation, customer service, reporting, EDI and more. With HEALTHsuite's advanced automation tools, health plans can dramatically increase processing capacity while minimizing staffing requirements.

*eHealthsuite* is RAM's web portal product. *eHealthsuite* provides real-time access to information for a health plan's constituent groups (providers, members, brokers and employer groups). This real-time access to information promotes self service via the Internet and reduces demands on customer support personnel. Together these solutions allow health plans to reduce costs while improving service levels.

"RAM Technologies specializes in reducing administrative expenses for healthcare payers - without compromising service levels or productivity," states Christopher P. Minton, Executive Vice President of RAM Technologies. "As health plans have struggled in this competitive economy, more organizations have turned to RAM and our solutions to help them. It is a great honor to be recognized by the Philadelphia Business Journal for this accomplishment."

The Philadelphia Business Journal's "Largest Tech Employers" is an annual list that recognizes Greater Philadelphia organizations that are experiencing the greatest growth. RAM Technologies has also been named to the Journal's list of Top Software Developers in the region.

**About RAM Technologies, Inc.**

RAM Technologies' solutions HEALTHsuite and *eHealthsuite* are in use by health plans and other healthcare payers across the United States and in Puerto Rico. For over 29 years RAM has supplied superior system solutions to a wide range of organizations serving the Medicaid,
