RAM Technologies Adds Customized Enrollment Capabilities to HEALTHsuite® Enterprise Claims Management Solution

FORT WASHINGTON, PENN. – July 21, 2009 – RAM Technologies, Inc., a leading developer of advanced software solutions for healthcare payers continues to expand the capabilities of HEALTHsuite. This new feature allows health plans to customize their enrollment process by selecting the data elements that are important to their organization, thereby reducing the time it takes to enroll new members. The overall result is a faster enrollment process with fewer errors for both the customer and the plan. It also provides users the ability to maintain the labels associated with these fields.

HEALTHsuite is an innovative web based solution developed to automate the complex business of healthcare administration. Healthcare organizations looking for a fully integrated product that provides powerful functionality across the enterprise appreciate the intuitive and user-friendly interface offered by HEALTHsuite. HEALTHsuite's rules based engine and open architecture provide unmatched flexibility for RAM's clients. The ability to customize dialogs further adds to the flexibility and adaptability of HEALTHsuite.

“RAM Technologies has always been dedicated to solving complex business problems through advanced technology” states Robert A. Tulio, President of RAM Technologies. “Allowing users to customize dialogs is just another example of our dedication to produce the most flexible and efficient healthcare administration suite available to healthcare payers.”

About RAM Technologies, Inc.

RAM Technologies' solutions HEALTHsuite and *eHealthsuite*[™] are in use by health plans and other healthcare payers across the United States and in Puerto Rico. For over 28 years RAM has supplied superior system solutions to a wide range of organizations serving the Medicaid, Medicare, Commercial, Correctional and Federal Health Programs.
