

For Immediate Release

**RAM Technologies, Inc. and Their Enterprise Software Application
HEALTHsuite® are Well Positioned for Federal Health Care Reform**

FORT WASHINGTON, PENN. – August 7, 2009 – With the Federal Government about to introduce significant health care reform, many health care payers are looking to RAM Technologies, Inc. as their software solution HEALTHsuite® has long provided innovative support for the administration of Medicare, Medicare Advantage, Medicaid, CHIP, and Federal Employee Health Benefit Plans (FEHBP).

“Congressional discussions have had a significant focus on leveraging the know-how and experience of federally sponsored programs like Medicare and Federal Employee Health Plans. With significant changes to health care on the way, health care payers will benefit from advanced systems designed to accommodate federal health care processing requirements” says Robert Tulio, President of RAM Technologies, Inc. “The potential incorporation of government subsidies will go a long way to make health care more affordable for many under and uninsured Americans – but will create issues for many payers and core systems. HEALTHsuite already supports health care subsidies, along with the ability to split-out and assign financial responsibility for all beneficiaries across an unlimited number of entities including Federal and State Government. This is another example of RAM’s vision ensuring that our products are well positioned to support the future needs of our clients.”

HEALTHsuite is an innovative web based solution developed to automate the complex business of healthcare administration. Organizations looking for a fully integrated product suite designed to adapt to the ever changing demands of health care administration will appreciate the forward thinking and robust capabilities offered by HEALTHsuite.

About RAM Technologies, Inc.

RAM Technologies is a leading developer of enterprise wide healthcare administrative solutions for payers. For over 28 years RAM Technologies has created superior system solutions for health plans supporting Medicare, Medicaid, Commercial and Federal Health Programs.
