

For Immediate Release

RAM Technologies Named on Inc.'s Annual Ranking of The 5000 Fastest Growing Private Companies

FORT WASHINGTON, PENN. – September 23, 2010 - RAM Technologies, Inc. of Fort Washington, Pennsylvania has once again been named to the Inc. 5000 List. The List celebrates the fastest growing private companies in America. RAM Technologies achieved sales growth of 91% focused on the development of advanced software solutions to automate the complex business of health care administration. RAM Technologies solutions include HEALTHsuite® and *eHealthsuite*™.

HEALTHsuite is a fully integrated, enterprise wide application designed to automate all aspects of a health plan's business. HEALTHsuite provides advanced automation for benefit administration, eligibility / enrollment, provider contracting / reimbursement, premium billing, medical and utilization management, care management, claims adjudication, overpayment recovery, customer service, subrogation and more.

eHealthsuite is RAM's web portal product that reduces demands on a health plan's customer support team by providing real-time, self service access to information for members, providers, brokers and employers via the Internet. Combined, the HEALTHsuite administrative application and the *eHealthsuite* web portal provide health care payers with a system that increases employee productivity and streamlines business processes.

"The growth we are experiencing can be attributed to the design of our products and the ability of our people to execute in all areas of our business. We are focused on becoming the industry leader – and we are making great strides towards that objective," states Robert A. Tulio, President of RAM Technologies. "It is an honor to be recognized by such a prominent organization – we look forward to being named to the Inc. 5000 List for many years to come."

About the Inc. 5000

Now in its fourth year, the Inc. 5000 is the most comprehensive portrait of fast-growing private growing companies assembled anywhere. Each profile is researched and reported by one of the dozens of writers assigned to the projects and include interviews with the CEOs of almost all the companies on the list. Many firms are innovators with little coverage elsewhere; many others are using their cutting-edge savvy to grow their market share in traditional products and services, and are similarly underreported by the rest of the business media. The Inc. 5000 profiles are available on Inc.com.
